

Warranty & Support

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a refund or replacement for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

The SwiftPro 25W is covered against mechanical and structural defects that prevent it from working by a limited 24 month warranty.

This warranty covers only the product itself and excludes workmanship or materials related to its installation or any modifications.

A major failure may be, for example, a wireless charger not providing any charging shortly after it was first installed or if it was damaged while in the original packaging.

If the product stops working due to a mechanical or structural defect within the first 24 months we will repair or replace the product at our discretion.

Step 1: Drill a small hole in the surface

Drill a 15mm hole in the surface. Ensure the surface thickness is between 10mm and 50mm.

Step 2: Insert the wireless charger

- (a) Remove the adhesive backing from the underside of the wireless charger.
- (b) Feed the power cable and Wireless Charger through the hole, being careful to orient the charger so the logo is at the top and the LED light is at the bottom.

Step 3: Securely fasten the charger

Slide the Nut over the power cable onto the thread of the wireless charger, and tighten securely using a small wrench.

Step 4: Connect charger to power

Connect the wireless charger's power plug to the power supply, and then plug the power supply into a 240V power socket.
